Judge;

I think that Microsoft has dominated almost all computer based industries for long enough. They have been using these "monopolistic practices" to work against the government, and for that they should be punished to the maximum extent of the law. There are many other companies with the same technology as microsoft, who want a chance to make it in the computer industry. Microsoft should be broken down and not allowed to maintain their position in this high tech industry. Competition is a crucial part of any business, Microsoft needs to feel the pressures of having a competitor. Thank you for your time.

Sincerely,

Leslie Gialamas
